Download Toad for Oracle Free Trial PRAGMA READ_UNCOMMITTED; PRAGMA sync_file_range; PRAGMA read_commit; PRAGMA read_uncommitted; PRAGMA lock_mode; PRAGMA cache_size; PRAGMA read_conflict_val In today's enterprise environment, we have a plethora of databases and schemas, across many different platforms and products. We are exposed to different workflows and workflow lifecycles for the data. Often, we have multiple "build" databases (e.g. for UAT, QA, UCE, Production, etc). In addition to the above, we also have many repositories of production data (e.g. data warehouses, databases, etc) which span multiple platforms. These lead to huge and tangled workflows for our data. So how do you keep the teams and their workflows together? How do you create a workflow that makes sense, while still being scalable for the needs of the organization? Enter Toad for Oracle. Toad for Oracle is a visual tool for both Oracle databases as well as other databases, such as SQL Server, MySQL, etc. It is a database development and administration tool that allows developers, DBA's and Business Analysts to quickly and effectively connect to, query, edit, and manage their databases. Toad for Oracle's automation feature is a major aspect for those looking to scale up their workflow. Toad for Oracle can easily handle different build configurations, as well as platforms (e.g. Linux, Windows, Oracle, SQL Server, MySql). In addition, it provides great functionality for automation and maintaining data artifacts (e.g. change logs, version control, etc). Today, we will cover three key areas of Toad for Oracle: Simplify development and administration by providing access to the data via the same visual interface and knowledge base that application developers use. Provide complete database lifecycle management and automation capabilities Provide automation capabilities to simplify the development and management of data artifacts Simplify Development & Administration When you're a developer, working with Oracle databases is not that much different from working 82157476af
